

# **Social Security (Additional Payments) Bill**

## **Impact Analysis**

### **Background**

1. The Chancellor of the Exchequer announced a package of measures in February 2022 to support households across the income distribution in the context of the April increase in the energy price cap, as well as further measures at Spring Statement 2022, including through National Insurance changes, and an extension to the local authority-delivered Household Support Fund, which provides support for the most vulnerable households.
2. Through a package of measures announced on 26 May 2022, the government will provide over £15 billion of additional support, particularly focused on those with the greatest need. The announced package includes an expansion of the Energy Bills Support Scheme, which provides £400 to every household without any repayments; a one-off cost of living payment of £300 for pensioners, paid through the Winter Fuel Payment; additional support to those on eligible means-tested benefits through a one-off cost of living payment of up to £650 that will be paid in two instalments; and a £150 disability cost of living payment that will be paid to those on eligible disability benefits to help them with the particular extra costs they will face.
3. The Social Security (Additional Payments) Bill 2022 makes provisions about the means-tested benefit cost of living payment and the disability cost of living payment. These two cost of living payments are the focus of this impact assessment. This assessment does not include the impact of other announced measures, including the pensioner cost of living payment delivered through the Winter Fuel Payment, as they are not in scope of the Bill.
4. The means-tested benefit cost of living payment is a payment of up to £650 that will be paid in two instalments, for families in receipt of one of the following means-tested benefits during the qualifying period:
  - Universal Credit
  - Income-based Jobseekers Allowance
  - Income-related Employment and Support Allowance
  - Income Support
  - Working Tax Credit
  - Child Tax Credit
  - Pension Credit

5. The disability cost of living payment is a £150 payment for individuals in receipt of one of the following disability benefits during the qualifying period:

- Disability Living Allowance
- Personal Independence Payment
- Attendance Allowance
- Scottish Disability Benefits
- Armed Forces Independence Payment
- Constant Attendance Allowance
- War Pension Mobility Supplement

## Analysis

6. The one-off cost of living payments have been designed to enable timely direct transfers to support households in managing increased costs. These payments are designed to support those who are most in need this year. Given one-off payments were the only feasible way to meet this policy aim this impact assessment compares the impact of delivering this policy with not providing any additional support.

7. HMT published distributional analysis of the overall cost of living support measures, including the means-tested benefit and disability cost of living payments. This is available here:

[DA May 2022 publication.pdf \(publishing.service.gov.uk\)](#)

8. The analysis presented here supplements this by providing estimates of the volumes and available characteristics of recipients of the means-tested benefit cost of living payment and disability cost of living payment. Where claimants are eligible for a relevant means-tested and disability benefit on the respective qualifying date they will receive both payments.

9. Entitlement for the qualifying benefits for the disability cost of living payment is at the individual level. All analysis on the disability payment is therefore presented for individuals.

10. All means-tested benefits are assessed at the benefit unit level.<sup>1</sup> However, because of the different qualifying criteria and data collection across legacy benefits, Pension Credit, tax credits and Universal Credit, data is not consistent

---

<sup>1</sup> A benefit unit is defined to be a single adult or a married or cohabiting couple and any dependent children. For example a couple living with their young children and an elderly parent would be one household but two benefit units. The couple and their children would constitute one benefit unit, and the elderly parent would constitute another.

for all qualifying families. Where possible we have combined data to create a holistic view.

11. Estimates of the number of payments that will be made have been generated by using the forecasted caseloads for each of the qualifying benefits at the point at which eligibility for the payment will be assessed.<sup>2</sup> An adjustment<sup>3</sup> has then been made to account for claims which, at the point of assessment, are not recorded as having an entitlement but subsequently are assessed as having been eligible on the qualifying date – for example where a successful appeal leads to a backdated entitlement.
12. Breakdowns of impact by characteristic have been calculated by using the latest available administrative data to measure the composition of the caseload for each qualifying benefit and applying this proportionally to the overall qualifying caseload.<sup>4</sup> For the means-tested payment characteristic information has been provided based on the first instalment. Because not all characteristics are captured in administrative data the characteristics covered here are limited to geography, age and gender.

### **Overall impacts**

13. Tables 1 & 2 show the overall volumes of payments expected to be made under the two schemes, alongside information on the qualifying benefits. Over 8 million benefit units, nearly 1 in 4 of all families, will receive each instalment of the means-tested benefit cost of living payment.<sup>5</sup> 6.3 million individuals, nearly 1 in ten of the population, are expected to receive the £150 disability cost of living payment.<sup>6</sup> These payments are in addition to the Energy Bills Support Scheme and the cost of living payment for pensioners which provide further support to all households and all pensioners respectively.

---

<sup>2</sup> As the qualifying date for the 2nd payment has not yet been agreed we have used a September date in our estimates, but the qualifying date could be any time before 31 October.

<sup>3</sup> Tax credits and Ministry of Defence benefits have not been included in the adjustment as the number of cases impacted is expected to be small (c.10,000)

<sup>4</sup> The analysis is based on historical benefit receipt, adjusted to align with expected volumes in May 2022. For DWP benefits data is based on November 2021, adjusted to OBR forecasts for May 2022. For tax credits we have used April 2022 data adjusted forecasts for May 2022. For Northern Ireland constituency data is from February 2022, whilst for other characteristics data for GB has been adjusted to the UK level. For benefits administered by the MoD we have used the most recently available data (March 2021) without adjustment as these benefits are generally stable over time.

<sup>5</sup> Number of benefit units/families in the UK (around 36m) estimated using data from the Family Resources survey 2019/20 adjusted for population growth.

<sup>6</sup> The UK population is estimated to be 67.6million in 2022: [National population projections - Office for National Statistics](#)

### ***Means-tested benefit cost of living payment***

14. For the means-tested benefit cost of living payment around half of payments will be received by families qualifying due to an entitlement to Universal Credit. Around a sixth of payments will be received by families qualifying through Pension Credit. The remaining third of families will qualify due to entitlement to tax credits only or legacy DWP benefits (ESA/JSA/IS).

**Table 1 – Estimated number of benefit units eligible for the means-tested benefit cost of living payment by qualifying benefit**

Qualifying benefit	Cases (Thousands)		Proportion	
	Payment 1	Payment 2	Payment 1	Payment 2
Income based JSA	50	42	1%	1%
Income Support	177	155	2%	2%
Income Based ESA	1,221	1,168	15%	14%
Tax credits	1,145	1,115	14%	14%
Universal Credit	4,219	4,283	51%	53%
Pension Credit	1,401	1,375	17%	17%
Total	8,213	8,138	100%	100%

### ***Disability cost of living payment***

15. For the disability cost of living payment around half of payments will be received by people in receipt of Personal Independence Payment, around a quarter of the payments by people in receipt of Disability Living Allowance and a further quarter by people in receipt Attendance Allowance.

**Table 2 – Estimated number of individuals eligible for the disability cost of living payment by qualifying benefit**

Qualifying benefit	Cases (thousands)	Proportion
Personal Independence Payment	3,309	52%
Disability Living Allowance	1,420	23%
Attendance Allowance	1,562	25%
Other	12	-
Total	6,303	100%

## **Impacts by geography**

16. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the distribution of impacts is defined by the current distribution of means-tested and disability benefit receipt across the UK.
17. Table 3 shows the estimated number of benefit units that will receive the means-tested benefit cost of living payment by region. The distribution of these payments tracks the distribution of means-tested benefits. In line with overall numbers of means-tested benefit claimants and population variations the largest volume of payments will be received in London and the North West and the smallest number in Northern Ireland and the North East.

**Table 3: Estimated number of benefit units eligible for the means-tested benefit cost of living payment by region<sup>7</sup>**

<b>Region</b>	<b>Cases (Thousands)</b>	<b>Proportion</b>
<b>London</b>	1,224	15%
<b>South West</b>	580	7%
<b>South East</b>	846	10%
<b>Eastern</b>	627	8%
<b>West Midlands</b>	792	10%
<b>East Midlands</b>	551	7%
<b>North West</b>	1,048	13%
<b>North East</b>	397	5%
<b>Yorkshire and The Humber</b>	722	9%
<b>Wales</b>	426	5%
<b>Scotland</b>	689	8%
<b>Northern Ireland</b>	309	4%
<b>Total</b>	8,213	100%

18. Table 4 shows the estimated number of individuals that will receive the disability payment by region. The largest volume of payments will be received in London, the North West and the South East and the smallest number in Northern Ireland and the North East. This reflects the slightly different distribution of disability claimants compared to means-tested benefits.
19. Annex A contains further information on payments of the means-tested and disability cost of living payment by Westminster parliamentary constituency.

---

<sup>7</sup> For a small number of tax credits claims, it has not been possible to determine a region. They are still included in the totals.

**Table 4: Estimated number of individuals eligible for the disability cost of living payment by region**

Region	Cases (Thousands)	Proportion
London	608	10%
South West	491	8%
South East	681	11%
Eastern	498	8%
West Midlands	566	9%
East Midlands	451	7%
North West	820	13%
North East	325	5%
Yorkshire and The Humber	535	8%
Wales	407	6%
Scotland	607	10%
Northern Ireland	315	5%
Total	6,303	100%

### **Impacts by age**

20. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the distribution of impacts is defined by the current distribution of means-tested and disability benefit receipt across the UK.

### ***Means-tested benefit cost of living payment***

21. Table 1 shows that around 8 in ten means-tested benefit cost of living payments will be paid to benefit units receiving working age benefits and 2 in ten to benefit units receiving Pension Credit. This reflects the fact that the working age population is larger than the pensioner population and working age families are more likely to receive means-tested benefits than pensioner families.
22. Data on age for the benefits which define entitlement to the means-tested benefit cost of living payment are not collected on a consistent basis. For claimants of Universal Credit and tax credits data is available for all adults within the benefit unit covered by a claim. For Pension Credit and DWP legacy benefits information is only available for the claimant, which does not, in all cases, include every adult within the relevant benefit unit.
23. Table 5 and 6 provide data on working age benefits. Table 5 shows that around two thirds of adults in benefit units qualifying through Universal Credit and tax credits are aged between 25 and 49. This reflects the fact that these benefits are more likely to be claimed by families with children. In contrast table 6 shows that around half of claimants in benefit units that qualify due to entitlement to DWP legacy benefits (JSA/ESA/IS) are aged 50 or older. This reflects the fact that

most benefit units qualifying for the additional payment through legacy benefits have entitlement to ESA which is paid for people unable to work due to a health condition and is more common amongst older people.

**Table 5: Estimated number of adults in benefit units eligible for the means-tested benefit cost of living payment qualifying through Universal Credit and tax credits by age<sup>8</sup>**

Age band	Adults (thousands)	Proportion
16-19	159	2%
20-24	668	9%
25-29	845	11%
30-34	1,083	15%
35-39	1,133	15%
40-44	1,023	14%
45-49	836	11%
50-54	698	9%
55-59	510	7%
60-65	431	6%
Over 65	61	1%

**Table 6: Estimated number of claimants in benefit units eligible for the means-tested benefit cost of living payment qualifying through legacy benefits (JSA/ESA/IS) by age<sup>9</sup>**

Age band	Claimants (thousands)	Proportion
Under 18	0	0%
18-24	41	3%
25-34	235	16%
35-44	279	19%
45-49	170	12%
50-54	219	15%
55-59	240	17%
60-64	221	15%
65-69	42	3%

24. Table 7 provides data on Pension Credit. This shows that around half of claimants qualifying for the additional payment through Pension Credit are aged

<sup>8</sup> For Universal Credit and tax credits data is available for all adults in the eligible benefit unit. Because there can be more than one adult in a qualifying benefit unit the total numbers of adults do not sum to the total number of payments made.

<sup>9</sup> For legacy DWP benefits data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

70-79. This reflects the greater number of pensioners in this age band compared to older age bands and the fact that younger pensioners are more likely to have higher incomes and therefore not qualify for Pension Credit.

**Table 7: Estimated number of claimants in benefit units eligible for the means-tested benefit cost of living payment qualifying through pension credit by age**  
<sup>10</sup>

Age band	Claimants (thousands)	Proportion
65-69	160	11%
70-74	362	26%
75-79	317	23%
80-84	249	18%
85-89	176	13%
90 and over	137	10%

### ***Disability cost of living payment***

25. Table 8 shows the distribution of the disability cost of living payment by age. Older people are more likely to receive the disability payment, with around half of all recipients aged 60 or over. This reflects the fact that the prevalence of disability, and therefore disability benefit receipt, increases with age.

---

<sup>10</sup> For Pension Credit data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

**Table 8 – Estimated number of individuals eligible for the disability cost of living payment by age**

<b>Age band</b>	<b><i>Cases (Thousands)</i></b>	<b><i>Proportion</i></b>	<b><i>Cumulative %</i></b>
<b>Under 18</b>	754	12%	12%
<b>18-24</b>	247	4%	16%
<b>25-29</b>	183	3%	19%
<b>30-34</b>	206	3%	22%
<b>35-39</b>	219	3%	26%
<b>40-44</b>	241	4%	29%
<b>45-49</b>	292	5%	34%
<b>50-54</b>	400	6%	40%
<b>55-59</b>	476	8%	48%
<b>60-64</b>	499	8%	56%
<b>65-69</b>	491	8%	64%
<b>70-74</b>	508	8%	72%
<b>75-79</b>	527	8%	80%
<b>80-84</b>	497	8%	88%
<b>85-89</b>	423	7%	95%
<b>90 and over</b>	340	5%	100%

### **Impacts by gender**

26. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the distribution of impacts is defined by the current distribution of means-tested and disability benefit receipt across the UK.

### ***Means-tested benefit cost of living payment***

27. Tables 9 and 10 provide details of recipients of the means-tested benefit cost of living payment qualifying through working age benefits. Table 11 provides details of recipients of the payment qualifying through Pension Credit. Overall women are more likely to receive the payment than men. This is because women are more likely to be receiving working age or pension age qualifying benefits.

**Table 9: Estimated number of adults in benefit units eligible for the means-tested benefit cost of living payment qualifying through Universal Credit and tax credits by gender<sup>11</sup>**

	<b>Adults (Thousands)</b>	<b>Proportion</b>
<b>Male</b>	3,242	44%
<b>Female</b>	4,205	56%

**Table 10: Estimated number of claimants in benefit units eligible for the means-tested benefit cost of living payment qualifying through legacy benefits (JSA/ESA/IS) by gender <sup>12</sup>**

	<b>Claimants (Thousands)</b>	<b>Proportion</b>
<b>Male</b>	699	48%
<b>Female</b>	750	52%

**Table 11: Estimated number of claimants in benefit units eligible for the means-tested benefit cost of living payment qualifying through Pension Credit by gender <sup>13</sup>**

	<b>Claimants (Thousands)</b>	<b>Proportion</b>
<b>Male</b>	485	35%
<b>Female</b>	916	65%

### ***Disability cost of living payment***

28. Table 12 shows the breakdown of recipients of the disability cost of living payment by gender. Around 3.4 million women and 2.9 million men will receive the payment. This is because women are slightly more likely to be in receipt of disability benefits than men.

---

<sup>11</sup> For Universal Credit and Tax Credits data is available for all adults in the eligible benefit unit. Because there can be more than one adult in a qualifying benefit unit the total numbers of adults do not sum to the total number of payments made.

<sup>12</sup> For legacy DWP benefits data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

<sup>13</sup> For Pension Credit data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

**Table 12: Estimated number of individuals eligible for the disability cost of living payment by gender**

	<b>Cases (Thousands)</b>	<b>Proportion</b>
<b>Male</b>	2,898	46%
<b>Female</b>	3,405	54%

## Annex A: Payments by Parliamentary Constituency

**Table A1: Estimated number of benefit units eligible for the means-tested benefit cost of living payment and number of individuals eligible for the disability cost of living payment by Westminster parliamentary constituency**

<b>Parliamentary constituency</b>	<b>Benefit units eligible for the means-tested benefit payment*</b>	<b>Individuals eligible for the disability payment*</b>
<b>Aberavon</b>	11,600	12,100
<b>Aberconwy</b>	7,100	6,800
<b>Aberdeen North</b>	13,300	9,300
<b>Aberdeen South</b>	7,700	5,800
<b>Airdrie and Shotts</b>	13,400	13,300
<b>Aldershot</b>	10,500	6,800
<b>Aldridge-Brownhills</b>	8,300	8,300
<b>Altrincham and Sale West</b>	7,000	6,600
<b>Alyn and Deeside</b>	9,200	8,400
<b>Amber Valley</b>	10,700	10,200
<b>Angus</b>	11,000	9,100
<b>Arfon</b>	7,600	6,100
<b>Argyll and Bute</b>	9,600	9,400
<b>Arundel and South Downs</b>	6,700	6,800
<b>Ashfield</b>	14,300	13,700
<b>Ashford</b>	13,200	10,800
<b>Ashton-under-Lyne</b>	16,100	11,100
<b>Aylesbury</b>	10,300	8,000
<b>Ayr, Carrick and Cumnock</b>	14,100	12,700
<b>Banbury</b>	10,900	8,800
<b>Banff and Buchan</b>	9,500	8,500
<b>Barking</b>	24,900	10,700
<b>Barnsley Central</b>	13,800	12,000
<b>Barnsley East</b>	14,700	13,700
<b>Barrow and Furness</b>	10,300	10,700
<b>Basildon and Billericay</b>	11,300	8,100
<b>Basingstoke</b>	10,300	7,900
<b>Bassetlaw</b>	12,800	12,000
<b>Bath</b>	8,000	6,400
<b>Batley and Spen</b>	16,200	10,100
<b>Battersea</b>	11,700	5,800

\* Estimates rounded to the nearest 100. For a small number of tax credits claimants, it has not been possible to determine a Parliamentary Constituency. They have still been included in the totals.

<b>Beaconsfield</b>	6,300	5,700
<b>Beckenham</b>	6,000	5,100
<b>Bedford</b>	15,000	9,100
<b>Belfast East</b>	14,600	14,900
<b>Belfast North</b>	26,600	24,000
<b>Belfast South</b>	13,900	13,500
<b>Belfast West</b>	27,100	24,700
<b>Bermondsey and Old Southwark</b>	22,100	10,400
<b>Berwickshire, Roxburgh and Selkirk</b>	10,600	8,800
<b>Berwick-upon-Tweed</b>	7,600	7,600
<b>Bethnal Green and Bow</b>	26,000	11,100
<b>Beverley and Holderness</b>	9,000	9,200
<b>Bexhill and Battle</b>	10,500	10,400
<b>Bexleyheath and Crayford</b>	9,400	7,800
<b>Birkenhead</b>	19,100	15,100
<b>Birmingham, Edgbaston</b>	15,900	9,200
<b>Birmingham, Erdington</b>	23,400	13,600
<b>Birmingham, Hall Green</b>	24,600	11,400
<b>Birmingham, Hodge Hill</b>	30,600	14,100
<b>Birmingham, Ladywood</b>	32,400	11,700
