

# Social Security (Additional Payments) (No. 2) Bill

## Impact Analysis

### Background

1. The Chancellor of the Exchequer announced a package of measures on 17th November 2022 worth £26bn to support people in the financial year 2023/24 with cost of living pressures. The announced package includes Cost of Living Payments (referred to as 'additional payments' in the Social Security (Additional Payments) (No. 2) Bill) of up to £900 for households on eligible means-tested benefits. A separate £300 payment will be made to pensioner households and individuals in receipt of eligible disability benefits will receive a £150 payment. The combined cost of these 3 payments in 2023/24 is estimated to be over £11 billion, £7,475 million for the means-tested benefit payment, £1,170 million for the disability benefit payment, and £2,610 million for the pensioner payment.
2. For those who require extra support, the Government announced an additional £1 billion of funding, including Barnett impact, to enable the extension of the Household Support Fund in England in the next financial year. This is on top of what we have already provided since October 2021, bringing total funding to £2.5 billion. In England this will be delivered through an extension to the Household Support Fund backed by £842 million, running from 1 April 2023 to 31 March 2024, which local authorities use to help households with the cost of essentials. It will be for the devolved administrations to decide how to allocate their additional Barnett funding.
3. The Social Security (Additional Payments) (No.2) Bill makes provisions about the means-tested benefit Cost of Living Payment and the disability Cost of Living Payment. These Cost of Living Payments are the focus of this impact assessment. This assessment does not include the impact of other announced measures, including the pensioner Cost of Living Payment delivered through the Winter Fuel Payment, as they are not in scope of the Bill.
4. The means-tested benefit Cost of Living Payment will be paid in three payments, each with separate and independent eligibility criteria, for families in receipt of one of the following means-tested benefits during the qualifying period:
  - Universal Credit
  - Income-based Jobseekers Allowance
  - Income-related Employment and Support Allowance
  - Income Support
  - Working Tax Credit
  - Child Tax Credit
  - Pension Credit
5. The disability Cost of Living Payment is a £150 payment for individuals in receipt of one of the following disability benefits during the qualifying period:
  - Disability Living Allowance

- Personal Independence Payment
- Attendance Allowance
- Scottish Disability Benefits
- Armed Forces Independence Payment
- Constant Attendance Allowance
- War Pension Mobility Supplement

## Analysis

6. The one-off Cost of Living Payments have been designed to enable timely direct transfers to support households in managing increased costs. These payments are designed to support those who are most in need this year.
7. HMT published distributional analysis of the overall measures announced in Autumn Statement 2022, including the means-tested benefit and disability Cost of Living Payments. This is available here:

[Impact on households - AS22.pdf \(publishing.service.gov.uk\)](#)

8. The analysis presented here supplements this by providing estimates of the volumes and available characteristics of recipients of the means-tested benefit Cost of Living Payment and disability Cost of Living Payment. These estimates are driven by underlying forecasts of claims to the qualifying benefits, and like all forecasts they may differ from the final number of payments made.
9. Entitlement for the qualifying benefits for the disability Cost of Living Payment is at the individual level. All analysis on the disability payment is therefore presented for individuals.
10. All means-tested benefits are assessed at the benefit unit level.<sup>1</sup> However, because of the different qualifying criteria and data collection across legacy benefits, Pension Credit, Tax Credits and Universal Credit, data is not consistent for all qualifying families. Where possible we have combined data to create a holistic view.
11. Estimates of the number of payments that will be made have been generated by using the forecasted caseloads for each of the qualifying benefits at various points in time. For illustrative purposes we have used February 2023, September 2023 and February 2024.
12. An adjustment<sup>2</sup> has then been made to account for claims which, at the point of assessment, are not recorded as having an entitlement but subsequently are

---

<sup>1</sup> A benefit unit is defined to be a single adult or a married or cohabiting couple and any dependent children. For example a couple living with their young children and an elderly parent would be one household but two benefit units. The couple and their children would constitute one benefit unit, and the elderly parent would constitute another.

<sup>2</sup> The proportion of payments that are expected to establish entitlement after the initial assessment vary by benefit. For Means-tested working age benefit, it is estimated to be 0.55%. For Pension Credit it is estimated to be 2%. For disability payments it is estimated to be 4%. Tax Credits and Ministry of Defence benefits have not been included in the adjustment as the number of cases impacted is expected to be small (c.10,000)

assessed as having been eligible on the qualifying date – for example where a successful appeal leads to a backdated entitlement.

13. Breakdowns of impact by characteristic have been calculated by using the latest available administrative data to measure the composition of the caseload for each qualifying benefit and applying this proportionally to the overall qualifying caseload.<sup>3</sup> For the means-tested payment characteristic information has been provided based on the first payment. Because not all characteristics are captured in administrative data the characteristics covered here are limited to geography, age and gender.

### **Overall impacts**

14. Tables 1 & 2 show the overall volumes of payments expected to be made under the two schemes, alongside information on the qualifying benefits. Over 8 million benefit units, over 1 in five of all families, are expected to receive each payment of the means-tested benefit Cost of Living Payment.<sup>4</sup> 6.7 million individuals, 1 in ten of the population, are expected to receive the £150 disability Cost of Living Payment.<sup>5</sup> These payments are in addition to the Cost of Living Payment for pensioners which provide further support to all pensioners.<sup>6</sup>

### ***Means-tested benefit Cost of Living Payment***

15. For the means-tested benefit Cost of Living Payment over half of payments are expected to be received by families qualifying due to an entitlement to Universal Credit. Around a sixth of payments are expected to be received by families qualifying through Pension Credit. The remainder of families will qualify due to entitlement to Tax Credits or legacy DWP benefits (Income-based Jobseekers Allowance, Income-related Employment and Support Allowance and Income Support).<sup>7</sup>

---

<sup>3</sup> The analysis is based on historical benefit receipt, adjusted to align with expected volumes when payments are made. Income-based Jobseekers Allowance, Income-related Employment and Support Allowance, Income Support and Pension Credit data is all based on May 2022, adjusted to OBR forecasts for February 2023. For Universal Credit we have used November 2022 data and adjusted to OBR forecasts for February 2023. For Tax Credits we have used December 2022 data and adjusted to OBR forecasts for February 2023. For Northern Ireland parliamentary constituency and local authority data is from August 2022, whilst for other characteristics data for GB has been adjusted to the UK level. For benefits administered by the MoD we have used the most recently available data (March 2021) without adjustment as these benefits are generally stable over time.

<sup>4</sup> Number of benefit units/families in the UK (around 36m) estimated using data from the Family Resources survey 2020/21 adjusted for population growth.

<sup>5</sup> The UK population is estimated to be 67.8 million in 2023: [National population projections - Office for National Statistics](#)

<sup>6</sup> The proportion of both individuals and families that are likely to receive multiple Cost of Living Payments were estimated using DWP's Policy Simulation Model of the UK tax and benefit system. Estimates suggest nearly 60% of individuals that receive disability benefits will receive additional support through the means-tested benefit payment, and over 85% will receive either or both of the means-tested and pensioner payment. Around 50% of families that receive the means-tested benefit payment will also receive either the disability or pensioner payment.

<sup>7</sup> Due to the continuing rollout of Universal Credit, the number of families qualifying through Tax Credits and legacy DWP benefits is decreasing over time, as the number qualifying through Universal Credit increases.

**Table 1 – Estimated number of benefit units eligible for each means-tested benefit Cost of Living Payment by qualifying benefit**

Qualifying benefit	First payment caseload (thousands)	Second payment caseload (thousands)	Third payment caseload (thousands)
Income based JSA	34	27	23
Income Support	148	126	113
Income Based ESA	1,128	1,059	1,013
Tax Credits	891	758	618
Universal Credit	4,513	4,825	5,116
Pension Credit	1,384	1,344	1,329
<b>Total</b>	<b>8,097</b>	<b>8,139</b>	<b>8,211</b>

### ***Disability Cost of Living Payment***

16. For the disability Cost of Living Payment around half of payments will be received by people in receipt of Personal Independence Payment, around a quarter of the payments by people in receipt of Disability Living Allowance and a further quarter by people in receipt Attendance Allowance.

**Table 2 – Estimated number of individuals eligible for the disability Cost of Living Payment by qualifying benefit<sup>8</sup>**

Qualifying benefit	Cases (thousands)	Proportion
Personal Independence Payment	3,666	54%
Disability Living Allowance	1,457	22%
Attendance Allowance	1,617	24%
Other	8	-
<b>Total</b>	<b>6,748</b>	<b>100%</b>

### **Impacts by geography**

<sup>8</sup> For methodological reasons, Scottish disability payments are counted as uplifts to the caseloads for Personal Independence Payment, Disability Living Allowance, and Attendance Allowance.

17. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the distribution of impacts is defined by the current distribution of means-tested and disability benefit receipt across the UK.

18. Table 3 shows the estimated number of benefit units that will receive the means-tested benefit Cost of Living Payment by region and country. The distribution of these payments tracks the distribution of means-tested benefits. In line with overall numbers of means-tested benefit claimants and population variations the largest volume of payments will be received in London and the North West and the smallest number in Northern Ireland and the North East.

**Table 3: Estimated number of benefit units eligible for the means-tested benefit Cost of Living Payment by region<sup>9</sup>**

Region	Cases (Thousands)	Proportion
London	1,187	15%
South West	567	7%
South East	830	10%
Eastern	615	8%
West Midlands	783	10%
East Midlands	545	7%
North West	1,033	13%
North East	395	5%
Yorkshire and The Humber	713	9%
Wales	422	5%
Scotland	686	8%
Northern Ireland	321	4%
<b>Total</b>	<b>8,097</b>	<b>100%</b>

19. Table 4 shows the estimated number of individuals that will receive the disability payment by region and country. The largest volume of payments will be received in the North West, South East and London and the smallest number in Northern Ireland and the North East. This reflects the slightly different distribution of disability claimants compared to means-tested benefits.

20. Annex's A and B contain further information on payments of the means-tested and disability Cost of Living Payment by Westminster Parliamentary Constituency and Local Authority respectively.

---

<sup>9</sup> For a small number of Tax Credits claims, it has not been possible to determine a region. They are still included in the totals.

**Table 4: Estimated number of individuals eligible for the disability Cost of Living Payment by region**

Region	Cases (Thousands)	Proportion
London	653	10%
South West	524	8%
South East	733	11%
Eastern	535	8%
West Midlands	606	9%
East Midlands	484	7%
North West	878	13%
North East	349	5%
Yorkshire and The Humber	574	9%
Wales	433	6%
Scotland	639	9%
Northern Ireland	340	5%
<b>Total</b>	<b>6,748</b>	<b>100%</b>

### **Impacts by age**

21. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the age distribution is defined by the current distribution of means-tested and disability benefit receipt across the UK.

### ***Means-tested benefit Cost of Living Payment***

22. Table 1 shows that around 8 in ten means-tested benefit Cost of Living Payments will be paid to benefit units receiving working age benefits and 2 in ten to benefit units receiving Pension Credit. This reflects the fact that the working age population is larger than the pensioner population and working age families are more likely to receive means-tested benefits than pensioner families.

23. Data on age for the benefits which define entitlement to the means-tested benefit Cost of Living Payment are not collected on a consistent basis. For claimants of Universal Credit and Tax Credits data is available for all adults within the benefit unit covered by a claim. For Pension Credit and legacy DWP benefits information is only available for the lead claimant, which does not, in all cases, include every adult within the relevant benefit unit.

24. Table 5 and 6 provide data on working age benefits. Table 5 shows that around two thirds of adults in benefit units qualifying through Universal Credit and Tax Credits are aged between 25 and 49. This reflects the fact that these benefits are more likely to be claimed by families with children. In contrast table 6 shows that around half of claimants in benefit units that qualify due to entitlement to DWP legacy benefits (Income-based Jobseekers Allowance, Income-related Employment and Support Allowance and Income Support) are aged 50 or older. This reflects the fact that most benefit units qualifying for the additional payment

through legacy benefits have entitlement to Income-related Employment and Support Allowance which is paid for people unable to work due to a health condition and is more common amongst older people.

**Table 5: Estimated number of adults in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through Universal Credit and Tax Credits by age<sup>10</sup>**

Age band	Adults (thousands)	Proportion
16-19	99	2%
20-24	432	8%
25-29	583	11%
30-34	782	14%
35-39	841	16%
40-44	767	14%
45-49	604	11%
50-54	512	9%
55-59	386	7%
60-65	346	6%
Over 65	50	1%

**Table 6: Estimated number of claimants in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through legacy benefits (JSA/ESA/IS) by age<sup>11</sup>**

Age band	Claimants (thousands)	Proportion
Under 18	-	-
18-24	30	2%
25-34	207	16%
35-44	253	19%
45-49	151	12%
50-54	200	15%
55-59	222	17%
60-64	208	16%
65 and over	39	3%

25. Table 7 provides data on Pension Credit. This shows that around half of claimants qualifying for the additional payment through Pension Credit are aged 70-79. This reflects the greater number of pensioners in this age band compared to older age bands and the fact that younger pensioners are more likely to have higher incomes and therefore not qualify for Pension Credit.

<sup>10</sup> For Universal Credit and Tax Credits data is available for all adults in the eligible benefit unit. Because there can be more than one adult in a qualifying benefit unit the total numbers of adults do not sum to the total number of payments made.

<sup>11</sup> For legacy DWP benefits data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

**Table 7: Estimated number of claimants in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through Pension Credit by age**<sup>12</sup>

Age band	Claimants (thousands)	Proportion
65-69	148	11%
70-74	350	25%
75-79	328	24%
80-84	248	18%
85-89	175	13%
90 and over	135	10%

### ***Disability Cost of Living Payment***

26. Table 8 shows the distribution of the disability Cost of Living Payment by age. Older people are more likely to receive the disability payment, with around half of all recipients aged 60 or over. This reflects the fact that the prevalence of disability, and therefore disability benefit receipt, increases with age.

**Table 8 – estimated number of individuals eligible for the disability Cost of Living Payment by age band**

	Cases (Thousands)	Proportion
Under 18	810	12%
18-24	274	4%
25-29	203	3%
30-34	230	3%
35-39	244	4%
40-44	268	4%
45-49	311	5%
50-54	430	6%
55-59	515	8%
60-64	544	8%
65-69	530	8%
70-74	516	8%
75-79	568	8%
80-84	514	8%
85-89	439	7%
90 and over	351	5%

<sup>12</sup> For Pension Credit data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

## **Impacts by gender**

27. As entitlement to payment is dependent upon receipt of a relevant benefit during the qualifying period the gender profile is defined by the current distribution of means-tested and disability benefit receipt across the UK.

### ***Means-tested benefit Cost of Living Payment***

28. Tables 9 and 10 provide details of recipients of the means-tested benefit Cost of Living Payment qualifying through working age benefits. Table 11 provides details of recipients of the payment qualifying through Pension Credit. Overall females are more likely to receive the payment than males. This is because females are more likely to be receiving working age or pension age qualifying benefits.

**Table 9: Estimated number of adults in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through Universal Credit and Tax Credits by gender<sup>13</sup>**

	Adults (Thousands)	Proportion
Male	2,268	42%
Female	3,136	58%

**Table 10: Estimated number of claimants in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through legacy benefits (JSA/ESA/IS) by gender<sup>14</sup>**

	Claimants (Thousands)	Proportion
Male	635	49%
Female	675	51%

**Table 11: Estimated number of claimants in benefit units eligible for the means-tested benefit Cost of Living Payment qualifying through Pension Credit by gender<sup>15</sup>**

	Claimants (Thousands)	Proportion
Male	475	34%
Female	909	66%

### ***Disability Cost of Living Payment***

---

<sup>13</sup> For Universal Credit and Tax Credits data is available for all adults in the eligible benefit unit. Because there can be more than one adult in a qualifying benefit unit the total numbers of adults do not sum to the total number of payments made.

<sup>14</sup> For legacy DWP benefits data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

<sup>15</sup> For Pension Credit data is only available on the characteristics of people classed as benefit claimants, which does not always include all adults in the benefit unit. For this reason this data is not directly comparable with data from the other qualifying benefits.

29. Table 12 shows the breakdown of recipients of the disability Cost of Living Payment by gender. Around 3.6 million females and 3.1 million males will receive the payment. This is because females are slightly more likely to be in receipt of disability benefits than males.

**Table 12 – Estimated number of individuals eligible for the disability Cost of Living Payment by gender**

	Cases (Thousands)	Proportion
<b>Male</b>	3,100	46%
<b>Female</b>	3,648	54%

### **UC Nil Awards**

30. People who have a Universal Credit claim but their award is nulled ('received a nil award') during the qualifying period will not be entitled to a Cost of Living Payment.<sup>16</sup> Table 13 shows the number of UC households receiving a nil award during the qualifying period for the first 2022/23 Cost of Living Payment of £326, and the reason why.<sup>17</sup> Most UC households (423,000 / 85%) received a nil award solely due to the household's earnings. Of these, 79% also had a nil award solely due to earnings or left UC in the following assessment period. In the six assessment periods following the qualifying period 60% of the 423,000 had either nil awards solely due to earnings or left UC. Furthermore, there were 61,000 UC households that received a nil award due to a combination of reasons and the vast majority (84%) of those households included earnings as a factor.

**Table 13 – Estimated number of UC households receiving a nil award with an assessment period ending between 26<sup>th</sup> April 2022 and 25<sup>th</sup> May 2022<sup>18</sup>**

	Cases (Thousands)	Proportion
<b>Nil award due to household's earnings</b>	423	85%
<b>Nil award due to sanctions</b>	7	1%
<b>Nil award due to one of capital, other income or other benefits</b>	9	2%
<b>Nil award due to a combination of reasons</b>	61	12%
<b>Total</b>	500	100%

<sup>16</sup> Similarly, Tax Credit recipients with awards of less than £26 per annum are not eligible for Tax Credits or the associated Cost of Living Payments.

<sup>17</sup> A nil award has been defined as the household having received £0 after all elements, adjustments and reduction have been taken into account but prior to deductions and managed payment to landlord.

<sup>18</sup> This analysis does not account for Recoverable Hardship Payments and the figures are subject to change due to retrospection. The methodology and data source may vary from those used to derive entitlement to the Cost-of-Living Payment.

## Annex A: Payments by Parliamentary Constituency

**Table A1: Estimated number of benefit units eligible for the means-tested benefit Cost of Living Payment and number of individuals eligible for the disability Cost of Living Payment by Westminster parliamentary constituency**

Parliamentary constituency	Benefit units eligible for the means-tested payment*	Individuals eligible for the disability payment*
Aberavon	11,500	12,900
Aberconwy	7,000	7,100
Aberdeen North	13,300	9,700
Aberdeen South	7,800	6,200
